| Improving Light Field Camera Sample Design with Irregularity and Aberration | Li-Yi Wei - Dragoniac, Lytro, University of Hong Kong  
Chia-Kai Liang - Lytro  
Graham Myhre - Lytro  
Colvin Pitts - Lytro  
Kurt Akeley - Lytro |                                           |
| Parametric Self-supporting Surfaces via Direct Computation of Airy Stress Functions | Masaaki Miki - The University of Tokyo  
Takeo Igarashi - The University of Tokyo  
Philippe Block - ETH Zurich |                                           |
| Data-Driven Finite Elements for Geometry and Material Design         | Desai Chen - Massachusetts Institute of Technology (MIT)  
David Levin - The Walt Disney Company, Massachusetts Institute of Technology (MIT)  
Shinjiro Sueda - California Polytechnic State University, Massachusetts Institute of Technology (MIT), The Walt Disney Company  
Wojciech Matusik - Massachusetts Institute of Technology (MIT) |                                           |
| Computational Interlocking Furniture Assembly                        | Chi-Wing Fu - Nanyang Technological University  
Peng Song - University of Science and Technology of China  
Xiaoqi Yan - Nanyang Technological University  
Lee Wei Yang - Nanyang Technological University  
Pradeep Kumar Jayaraman - Nanyang Technological University  
Daniel Cohen-Or - Tel Aviv University |                                           |
| Sketchable Dynamic Deformations                                      | Martin Guay - Grenoble Universities, LJK, INRIA  
RÃ©mi Ronfard - Grenoble Universities, LJK, INRIA  
Michael Gleicher - University of Wisconsin  
Marie-Paule Cani - Grenoble Universities, LJK, INRIA |                                           |
| Controlling Procedural Modeling Programs with Stochastically-Ordered Sequential Monte Carlo | Daniel Ritchie - Stanford University  
Noah D. Goodman - Stanford University  
Pat Hanrahan - Stanford University | http://www.milliande-printables.com |

| High-Resolution Brittle Fracture Simulation with Boundary Elements   | David Hahn - IST Austria  
Chris Wojtan - IST Austria                                                   |
| Homogeneous Codes for Energy-Efficient Illumination and Imaging      | Matthew O'Toole - University of Toronto  
Supreet Achar - Carnegie Mellon University  
Srinivasa G. Narasimhan - Carnegie Mellon University  
Kiriakos N. Kutulakos - University of Toronto |
| Dihedral Angle-Based Maps of Tetrahedral Meshes                      | Gilles-Philippe Paillé - University of Montreal  
Nicolas Ray - INRIA  
Pierre Poulin - University of Montreal  
Alla Sheffer - University of British Columbia  
Bruno Lévy - INRIA |
| Power Particles: An incompressible fluid solver based on power diagrams | Fernando de Goes - California Institute of Technology  
Corentin Wallez - Ecole Polytechnique  
Jin Huang - State Key Lab of CAD & CG, Zhejiang University  
Dmitry Pavlov - Imperial College London  
Mathieu Desbrun - California Institute of Technology |
| Zoomorphic Shape Creation                                            | Noah Duncan - University of California, Los Angeles (UCLA)  
Lap-Fai Yu - University of Massachusetts  
Sai-Kit Yeung - Singapore University of Technology and Design  
Demetri Terzopoulos - University of California, Los Angeles (UCLA) |
| Practical Hex-Mesh Optimization via Edge-Cone Rectification          | Marco Livesu - University of British Columbia  
Alla Sheffer - University of British Columbia  
Nicholas Vining - University of British Columbia  
Marco Tarini - ISTI-CNR |
| Semantic Shape Editing                                               | Mehmet Ersin Yumer - Carnegie Mellon University  
Levent Burak Kara - Carnegie Mellon University |
| Dynamic Terrain Traversal Skills Using Reinforcement Learning        | Xue Bin Peng - University of British Columbia  
Glen Berseth - University of British Columbia  
Michiel van de Panne - University of British Columbia |
